## SOUTHERN AND EASTERN SCALEFISH AND SHARK FISHERY WORKSHOP ON REGIONALISED STOCKS

**You are invited to attend a workshop  
which is being held in Melbourne,  
on 31 August 2005 (note that it could also include 1 September)**

The **Regionalised Stocks Workshop** is being held to seek industry input on how to manage regionalised stocks. This workshop is the first stage in a process to determine how to more effectively manage a number of species which are present as more than one stock within the area of the SESSF.

Species under consideration include, but are not limited to blue warehou, ling, blue eye trevalla, gemfish, orange roughy, mirror dory, ocean perch, school shark and gummy shark.

### Workshop objectives:

- Develop criteria for determining distinct management units or stocks within the fishery.
- Identify species that fit the criteria.
- Determine what the appropriate spatial scale of the management unit should be (for example it could be dividing the TAC between east and west of Bass Strait).
- Develop a process for moving from the present arrangements where all species are treated as a "single" stock to new regional management.

**How to register** – please complete the attached registration form by 17 August 2005 and return to AFMA reception on (02) 6272 3087, this will provide AFMA with an indication of numbers for the workshop. Please note that at this stage the workshop is to be held over one day on 31 August 2005, however, AFMA would appreciate industry's advice as to whether it should be held over two days, that is 31 August and 1 September.

Further information will be forwarded to those who complete the attached registration form to attend the workshop. If you require further information concerning the workshop itself, please call Melissa Brown on (02) 6272 5465.

WORKSHOP REGISTRATIONS CLOSE ON 17 AUGUST 2005
