Commonwealth Line Daily Fishing Log – LN01A

General Information and Instructions for Holders of Fishing Concessions

Purpose

This logbook is to be used when line fishing in Commonwealth Fisheries. It is designed to provide a continuous record of line fishing operations undertaken by Commonwealth fishing concession holders. Accurate data collected in this logbook is essential to provide information for research into and management of Australian fisheries.

Important Information and Instructions

Completing the logbook

• This logbook must be completed for every day that the fishing concession is in force, regardless of whether or not fishing takes place on that day (see the “How to Complete” section).
• All logbook information must be recorded on a shot by shot and daily basis and details for the last day of the trip must be recorded before the boat docks at the end of each trip.
• No carbon paper is required when completing these forms. Please use a ballpoint pen and place the fold-out flap under the blue page to prevent marking the next set of forms.

Location of the logbook

• This logbook must be kept on board the boat that is nominated in respect of the fishing concession and named on the front of the logbook during fishing operations.
• This logbook must remain within a 50 metre radius of the boat.

Who should use this logbook?

• The holder of the fishing concession is responsible for ensuring that this logbook is completed and that it is certified as complete and correct. Alternatively, the holder can ensure these things are done on their behalf by a person authorised in writing to do so by the fishing concession holder in the approved form. Contact AFMA on phone (02) 6225 5555 (free call 1300 723 621) for details of how to authorise another person to complete the logbook.

Submitting logsheets

This logbook contains numbered pages in duplicate which are referred to as logsheets. Original copies must be returned to AFMA in date order in either the reply paid envelope provided or posted to:

The Logbook Co-ordinator
Australian Fisheries Management Authority
BOX 7051
Canberra Business Centre  ACT  2610

Original copies of logsheets must be returned within 3 calendar days of the consignment being unloaded. For quota managed fisheries and/or fisheries that require the completion of a catch disposal record (CDR), logsheets must be returned with the CDR for that trip. All duplicate copies of logsheets should be retained.

Penalties

Concession holders and authorised persons completing this logbook on their behalf are advised that:
(i) a failure by a concession holder to ensure the completion of the logbook in accordance with these instructions;
(ii) the giving of false or misleading information in the logbook by the concession holder or an authorised person completing the logbook on their behalf; or
(iii) the recording or communicating by the concession holder or anyone else of information in a logbook concerning the affairs of another person, or the giving by the concession holder or anyone else to another person of a part of a logbook in which information is recorded, (unless the recording, communicating or giving is done in accordance with the Fisheries Management Act 1991, Fisheries Administration Act 1991 or the Fisheries Management Regulations 1992 or an order of court, tribunal or a person authorised to receive evidence) may constitute serious offences under Commonwealth laws.

Concession holders are also advised that failure to ensure the completion of the logbook in accordance with the instructions may lead to suspension or cancellation of their concession.

Help Available

There is an example of a completed logsheet and further information and instructions about how to complete the logbook at the front of this logbook. If you have any questions or problems, please contact an AFMA Logbook Officer on (02) 6225 5555 (free call 1300 723 621).

April 2007
Commonwealth Line Daily Fishing Log – LN01A
Instruction Page

Vessel, Gear and Contact Details
The Vessel, Gear and Contact Details Form should be completed by the Concession Holder or Authorised Person and submitted to AFMA within 14 days of receipt of the logbook. A second Vessel, Gear and Contact Details Form is located in the middle of the logbook. Please complete and submit this form if any of the vessel and/or gear details change, or if the authorised person for the vessels logbook has changed.

Catch and Effort Log Page
When fishing, record details on a shot by shot basis. Please Note: For minor line fishing (Handline, Rod and Reel, or Trolling or Poling), if you change your fishing gear and/or move to another fishing location and/or you continually fish for longer than 24 hours please complete the details for that shot and start details for a new shot).

Gear Type/Code guide
This is a guide to line fishing methods and their gear codes. Use this table to fill in the Gear Used codes on a shot by shot basis.

Fishing Details
Gear Used
Circle the code for the gear type you are using as seen in the Gear Type/Code guide.

Inshore/Offshore
For every shot you must specify whether you are fishing inside 3 nautical miles or outside 3 nautical miles by circling Inshore or Offshore. (SESSF fishery only)

Target Species
Nominate the species you are targeting for each shot by writing in the name of the single most likely species that you expect to catch in the Target Species line (do this before setting the gear).

Date
Each column refers to one fishing shot. Record the date for the shot.

Start Fishing Time
Record the time when starting to shoot each shot.

Start and End Position
Record a start and an end latitude and longitude that represents the area that your gear is set between.

Start Haul Time
Record the time when starting to haul each shot (Only for Longline/Trotline fishing gear).

End Haul Time
Record the time when hauling ends for each shot. For minor line fishing (Handline, Rod and Reel, or Trolling or Poling) use this as your 'End Fishing Time'.

Minimum and Maximum Depth
Circle depth units (metres or fathoms) and record the maximum and minimum of the depth range fished.

Bait Used
Record the type of bait being used and an approximate weight (kg).

Longline (including autoline) and Trotline only
Record the total number of hooks and total length (m) of line used in the shot.

Dropline only
Record the number of times the lines were lifted during the shot and the average number of hooks per line.

Pole and minor line
Record the number of lines used if you are minor line fishing (Handline, Rod and Reel or Trolling or Poling).

Gear Lost
Record an estimated length of line lost in metres and number of hooks lost.

Fishery
Circle the code for the fishery/sector you are operating in. GHT (SESSF Gillnet, Hook and Trap sector of SESSF), CSF (Coral Sea Fishery), NFO (Norfolk Offshore), HS (High Seas Fishery), SKJ (Skipjack Fishery), ETBF (Eastern Tuna and Billfish Fishery) or WTBF (Western Tuna and Billfish Fishery).

If you are not operating in any of these fishing areas write in the name of the fishery in the space provided.

- Subject to the concession conditions, if during the one trip you move operations from one fishery to another, you must start a new logpage and circle the new fishery.

Non-Fishing Code
Circle the reason why you were not working during the dates you have indicated. If you were operating in another fishery please write in the name of the other fishery in the space provided.

Non-Fishing Period
If you are not fishing for a period within the month(s), please specify the dates during which you did not work. This will reduce the number of logsheets needed to account for every day your fishing concession is valid. Do not use single pages for single sequential non-fishing days.
Catch Details

Catch Weight
For each species caught and retained you must record the estimated weight (kg) kept.

Catch Number
This is voluntary but is very useful to determine whether there has been a change in average fish size over time. Note: Shark numbers must be recorded.

Form Code
If the estimated weight you recorded refers to fish that have been processed in line with concession requirements record the appropriate form code.
GG = Gilled and Gutted, HG = Headed and Gutted, F = Filleted, TR = Trunked (shark).

Discard Weight
For each species caught and not retained record the estimated weight (kg) discarded.

Discard Code
For each discarded species indicate the reason/s they were not kept using the following discard codes.

Other Species - If any species are caught that are not listed on the logsheet, specify their names in the blank spaces provided and record the estimated weights (kg) and form/discard codes for retained and discarded catch.

Note: For EACH TRIP a small amount of mixed species will be tolerated where the total amount of a single species is less than 10kg, this species may be combined with another species of the same or less weight (ie 10kg) and be recorded under the category of ‘mixed fish’. Where the total amount of a single species exceeds 10kg, that species must be recorded individually in the ‘Other Species’ section. All quota species must be recorded separately and not mixed with any other species.

Listed Marine and Threatened Species
Please circle YES or NO to indicate if your gear came into contact with or caught a listed marine or threatened species.
If you did have an interaction with a listed marine or threatened species you must complete the Listed Marine and Threatened Species Form at the back of this logbook and submit it with the relevant log page.

Time Box
All Commonwealth Departments are required to have time boxes included on their forms. This initiative forms a part of the Government’s regulatory reform strategy to reduce the paperwork and compliance burden on business.

Comments
This section is provided for any further information that you think may be important such as: gear failure, weather, damaged fish, size of fish, and loss of catch to seals etc.

Signature and Date Box
Each logsheet requires the date and signature of the Concession holder or Authorised Person (person authorised to act on behalf of the concession holder). The signature verifies that the information recorded in the logbook is an accurate record of the fishing operation including estimated landed weights.

**Comments**

Is there anything else that you believe to be important information, for example: Female, male, adult, juvenile?

Where was the animal tangled (flipper, mouth, wing, etc.)?

Where in the gear was the animal tangled (codend, wingend, warps, BRDs, etc.)?

How was the animal released (lowered by hand, lowered with a net into the water, cut out net, etc.)?

I certify the information, which I have provided on this form to be a complete and accurate record.

Please Remember

- In this logbook you must account for every day that your Fishing Concession is in force, regardless of whether or not you fish on that day.

- This logbook should be on your vessel and completed daily while you are fishing. The details for a shot must be recorded before hauling the next shot. Details for the last shot of the trip must be completed before the vessel enters port.

Line Fishing Daily Fishing Log – LN01A
Listed Marine and Threatened Species List

Under the Environment Protection and Biodiversity Conservation Act 1999 the following species are listed as protected. This list is current at the date of publishing. For further information about Listed Marine and Threatened Species or to check updates to these lists please go to www.deh.gov.au.

Please be as specific as you can with regard to the species identification.

LISTED MARINE SPECIES

Fish
All species of Syngnathid (Pipefish, Seahorses & Sea Dragons).

Marine Reptiles
All species of Turtle, Sea Snake and Crocodile.

Seals
All species of Seal and Sea Lion.

Cetaceans
All species of Dolphin, Whale, Porpoise and Dugong.

Sea Birds
All species of Seabird.

THREATENED FISH SPECIES

Grey Nurse Shark (*Carcharias taurus*) - East and west coast population
Speartooth Shark (*Glyphis sp. A*)
Northern River Shark (*Glyphis sp. C*)
Great White Shark (*Carcharodon carcharias*)
Freshwater Sawfish (*Pristis microdon*)
Whale Shark (*Rhincodon typus*)
