

## FINAL REPORT

### Protected species interactions reported in Commonwealth Fishery logbooks for the period **1 January to 31 March 2014**

Under the *Environment Protection and Biodiversity Conservation (EPBC) Act 1999* it is an offence for any person to undertake an activity in a Commonwealth area that results in the unintentional death, injury, trading, taking, keeping or moving of a species listed under the EPBC Act. However, the Act specifies certain actions are not offences, including actions undertaken in accordance with an accredited management plan or regime. All Commonwealth managed fisheries have been assessed and accredited under the Act on the basis that the management plan or regime includes all reasonable steps to ensure that members of protected species are not adversely affected by the fishing operation. As long as operators are fishing in accordance with the fishery management arrangements it is not an offence to interact with a protected species. It is, however, an offence not to report these interactions.

A Memorandum of Understanding (MOU) between the Australian Fisheries Management Authority (AFMA) and the Department of the Environment allows AFMA to report interactions with protected species in AFMA managed fisheries on behalf of fishers.

AFMA periodically provides summary reports on protected species interactions to the Department of the Environment. The record of protected species interactions for AFMA managed fisheries as reported in fishery logbooks for the period **1 January to 31 March 2014** is below. This report is compiled from official logbook records submitted to AFMA by fishers (concession holders). Logbook data is not routinely verified and therefore AFMA cannot attest to the accuracy of this data nor authenticate that this data is a complete record of all interactions occurring in the mentioned fisheries.

Final reports are published on the AFMA website at: <http://www.afma.gov.au/managing-our-fisheries/environment-and-sustainability/protected-species/>

Threatened, Endangered and Protected (TEP) species management fact sheets available on the AFMA website provide information on how TEP species interactions are minimised including specific mitigation measures currently in place, thereby providing a useful context for the quarterly reports.
