Annex C - Record of decisions of the Queensland Fisheries Joint Authority 2015	15

1. Introduction

This report of the Queensland Fisheries Joint Authority (QFJA) outlines activities undertaken and decisions made during the period **1 July 2015 to 30 June 2016**, predominantly through the “record of decisions” from the QFJA annual meeting. It also reports the status of fisheries for this reporting period.

The QFJA is responsible for the management of certain fish species as prescribed under the Offshore Constitutional Settlement Agreement. The Queensland Government is responsible for managing a number of fisheries in the Gulf of Carpentaria that take these species. Table 1 provides a breakdown of the total catch of each QFJA managed species.

2. Enabling legislation

Sections 61-70 of the Commonwealth [*Fisheries Management Act 1991*](#) set out the establishment, functions, administration and reporting requirements for Joint Authorities.

Part 7 of the Queensland [*Fisheries Act 1994*](#) sets out complementary State legislation and other matters relating to the establishment, functions, administration and reporting requirements of the Joint Authority and the management of Joint Authority fisheries in Queensland.

The QFJA is established in the *Arrangement between the Commonwealth of Australia and the State of Queensland in relation to the Fishery for Northern Demersal and Pelagic Fish in the Gulf of Carpentaria (Annex A)*. The 1995 arrangement provides, among other things, that the relevant species be managed by the QFJA under Queensland law.

There is a further arrangement between the Commonwealth and the State of Queensland, in relation to commercial fishing for grey mackerel in the Gulf of Carpentaria (**Annex B**), under section 71 of the *Fisheries Management Act 1991* and section 132 of the *Fisheries Act 1994* of Queensland. The 2003 arrangement provides, among other things, that the commercial fishery for grey mackerel also be managed by the QFJA under Queensland law.

3. Report on the status of fisheries managed by the Joint Authority

Tables 1 and 2 present a summary of the catches and status of the fisheries managed by the QFJA. Detailed catch and effort statistics for each fishery are presented in the Queensland Fishery Summary Report, available for download at:

- <https://www.daf.qld.gov.au/fisheries/monitoring-our-fisheries/data-reports/sustainability-reporting/queensland-fisheries-summary>

Table 1 shows an overview of the total commercial catches of fin fish species relevant to fishing under QFJA jurisdiction during the reporting period. These catches were taken using a combination of set mesh net, line and trawl fishing gear. Catch information has been drawn from the Queensland Commercial Fisheries Log Book System (CFISH) for waters adjacent to Queensland west of 142°31'49" east longitude

(at Cape York). 'Shark' catch includes all catches of shark and ray species taken by operators in Queensland's Gulf of Carpentaria net and line fisheries, while 'other fin fish' and 'trawled fin fish' catch includes all fish species except barramundi and threadfin (and other species not managed by QFJA) and those species otherwise listed separately in the table.

It is important to note that Table 1 presents a summary of the total catches in Gulf fisheries. Detailed information on catches of individual species within a particular fishery is available from the Queensland Fishery Summary Report (refer to previous web links) that are available for a range of fisheries through the DAF Queensland website.

In 2012 and 2014, the stock status of six QFJA stocks was assessed using the national Status of Key Australian Fish Stocks Framework. (Table 2). Fisheries Queensland has now adopted the Australian Government's framework for assessing stock status each year. For the most current assessment outcomes see www.fish.gov.au or Queensland specific species at www.fisheries.qld.gov.au

Data have been revised and updated since preliminary figures were presented in the 2014 QFJA minutes.

² The status of these stocks is currently being updated using 2013 data and will be published in December 2014 as part of the 'Status of Key Australian Fish Stocks Reports 2014' (to be published online at www.fish.gov.au).

4. Report on the activities of the Joint Authority during the reporting periods

Table 3 lists the Commonwealth and State members of the QFJA for each reporting period. The deputies of these members are stated in the Annexes (Record of decisions for each meeting).

2. Policy Matters

2.1 Update on direction for the Gulf of Carpentaria Finfish Trawl Fishery

Members noted that information contained in the Agenda paper and the associated discussions at the Northern Australian Fisheries Committee.

Members noted that Queensland intended to brief its Minister on the options to simplify the offshore Constitutional Settlement Arrangements (OCS) as they currently applied to that fishery.

It was further noted that, subject to that outcome of the discussions with the Queensland Minister, the optimum outcome would be to amend the existing OCS to provide for management of demersal finfish species in the Gulf of Carpentaria under a single jurisdiction. It was acknowledged that changes of this nature would require the support of the governments of the Commonwealth, Queensland and the Northern Territory and respective agencies were working together on this proposition.
